

# CONTENTS

- 1 *Literature review* Precipitation in creep resistant austenitic stainless steels  
T. Sourmail
- 15 *Review* Structural refinement of cast magnesium alloys  
M. Bamberger
- 25 Growth of needle and plate shaped particles: theory for small supersaturations, maximum velocity hypothesis  
P. E. J. Rivera-Diaz-del-Castillo and H. K. D. H. Bhadeshia
- 30 Theory for growth of spherical precipitates with capillarity effects  
P. E. J. Rivera-Diaz-del-Castillo and H. K. D. H. Bhadeshia
- 33 Microstructure and mechanical properties of as rolled high strength bainitic rail steels  
U. P. Singh, B. Roy, S. Jha, and S. K. Bhattacharyya
- 39 Plane strain fracture toughness of modern ferritic structural steels  
M. Capurro, P. Cirillo, and R. Palazzo
- 45 Microstructure and properties of heat treated iron powder compacts intended for ac soft magnetic applications  
L.-P. Lefebvre, I. P. Swainson, Y. Deslandes, G. Pleizier, and P. Chartrand
- 54 Effects of nitriding on fatigue strength of quenched and tempered steel; role of interstitial nitrogen  
B. M. Korevaar, S. Coorens, Y. Fu, J. Sietsma, and S. Van der Zwaag
- 63 Evaluation of chemical nucleation driving force for stoichiometric compounds with variable composition  
P. E. Di Nunzio
- 70 Application of three-dimensional numerical simulation to analysis of development of deformation zone at beginning of aluminium extrusion process  
T. Chanda, J. Zhou, and J. Duszczek
- 75 Formation of {111} fibre texture in recrystallised aluminium sheet  
O. Engler, H. C. Kim, and M. Y. Huh
- 87 Effect of interfacial shear strength on reliability of strength and fracture process of SiC-Al composite  
Y. Lu, M. Hirohashi, and J. Pan
- 93 Tensile behaviour of powder metallurgy processed (Al-Cu-Mg)/SiC<sub>p</sub> composites  
V. K. Varma, S. V. Kamat, and V. V. Kutumbarao
- 102 Influence of material swelling on surface roughness in diamond turning of single crystals  
S. To, C. F. Cheung, and W. B. Lee
- 109 Possible ways of enhancing high temperature ductility in CuO doped cubic zirconia (8Y-CSZ)  
S. Tekeli and T. J. Davies
- 113 *Short communication* Investigation of serrated flow behaviour in Al-10Mg alloy  
S. Kumar, K. V. Narsimha Rao, and M. K. Surappa
- 116 *Short communication* Transformation textures in new ultrahigh strength hot rolled microalloyed steel  
R. D. K. Misra and J. P. Anderson
- 119 *Overview* Some aspects of synthesis of nanocrystalline materials  
F. H. Froes, O. N. Senkov, and E. G. Baburaj
- 127 Evaluation of semiphysical phase transformation model for engineering steels using measured continuous cooling transformation diagrams  
P. J. van der Wolk, J. Sietsma, and S. V. Parker
- 135 Microstructure and mechanical properties of C-Mn-Si-(Nb) TRIP steels after simulated thermomechanical processing  
I. B. Timokhina, E. V. Pereloma, and P. D. Hodgson
- 141 Effect of temper embrittlement and specimen size on Charpy impact testing of a Cr-Mo-V rotor steel  
A. Shekhter, E. V. Pereloma, and S. P. Ringer
- 148 Strain aging of pearlitic steel wire during post-drawing heat treatments  
C. E. Hinchcliff and G. D. W. Smith
- 155 High temperature deformation of 316L stainless steel  
E. S. Puchi Cabrera
- 162 Austenisation kinetics of unalloyed and alloyed ductile iron  
M. Nili Ahmadabadi and M. H. Parsa
- 168 Prediction of surface hardness after ferritic nitrocarburising of steels using artificial neural networks  
T. Malinova, N. Pantev, and S. Malinov
- 175 Influence of recovery on dynamic segregation of sulphur to surface of cold rolled nickel  
R. Louahdi, G. Saindrenan, R. Le Gall, G. Liao, and P. Paillard
- 182 Numerical analysis of effect of material and processing parameters on thickness distribution during superplastic die bulging of cavity sensitive materials  
Y.-B. Xiang, D.-J. Chen, and S.-C. Wu
- 187 Microstructure and high strain rate superplasticity of *in situ* composite synthesised from aluminium and nano-ZrO<sub>2</sub> particles by powder metallurgy  
L. Geng, T. Imai, J. F. Mao, M. Takagi, and C. K. Yao
- 195 Synthesis and characterisation of free standing one-dimensional Al-SiC based functionally gradient material  
M. Gupta, S. C. Lim, and F. I. Tan
- 201 *In situ* stir cast Al-TiB<sub>2</sub> composite: processing and mechanical properties  
K. L. Tee, L. Lu, and M. O. Lai

- 207 Effect of silicon on microstructure, fluidity, mechanical properties, and fracture behaviour of Mg-6Al alloy  
Y.-Z. Lü, Q.-D. Wang, X.-Q. Zeng, W.-J. Ding, and Y.-P. Zhu
- 215 Effect of silver addition on formation of secondary phases in squeeze cast Al-Cu-Mg alloys  
Y.-C. Kim, D.-H. Kim, W. T. Kim, Y.-S. Han, and H. I. Lee
- 223 Tensile stress-strain and work hardening behaviour of 316LN austenitic stainless steel  
B. K. Choudhary, E. Isaac Samuel, K. Bhanu Sankara Rao, and S. L. Mannan
- 237 *Overview* Microtextural evolution during superplastic deformation of AA 8090 Al-Li alloy  
B. P. Kashyap, W. Fan, and M. C. Chaturvedi
- 249 Effect of strain path changes on strain hardening of 6082 aluminium alloy  
Y. G. An
- 258 Strain path change effects on stretch formability of 6082 aluminium alloy  
Y. G. An
- 264 Cyclic deformation behaviour and fatigue crack propagation of AZ91HP and AM50HP  
Z. Liu, Z.-G. Wang, Y. Wang, L.-H. Chen, H.-J. Zhao, and F. Klein
- 269 Mechanical anisotropy and stress-strain rate characteristics in superplastic deformation of titanium alloys  
B. Bai, H. S. Yang, N. P. Chen, and A. K. Mukherjee
- 278 Effect of heat treatment on age hardening behaviour of electroless nickel-phosphorus coatings  
R. Taheri, I. N. A. Oguocha, and S. Yannacopoulos
- 285 Structure-property relationships during high temperature deformation of Cu-4.5Ti alloy  
S. Nagarjuna and Abhijit Dutta
- 292 Properties and application of Fe-6Si-14Mn-8Cr-5Ni shape memory alloy  
J. C. Li, Z. Zhang, and Q. Jiang
- 296 Bainite transformation during continuous cooling of low carbon microalloyed steel  
I. A. Yakubtsov and J. D. Boyd
- 302 Tensile behaviour of type 304 austenitic stainless steels in hydrogen atmosphere at low temperatures  
D. Sun, G. Han, S. Vaodee, S. Fukuyama, and K. Yokogawa
- 309 Mechanical properties and wear behaviour of nitrided Fe-3.5Mo base sintered steels  
N. Candela, N. Antón, E. Gordo, F. Velasco, and J. M. Torralba
- 315 Influence of thermal aging on microstructural evolution and mechanical properties in titanium modified type 316 stainless steel containing phosphorus  
Y. Mandiang, A. Ciss, G. Sissoko, and G. Cizeron
- 321 Application of plasma chemical vapour deposition of TiN to HSS precision bearings  
Y.-L. Shi, H.-R. Peng, S.-Z. Li, and J.-H. Li
- 324 Oxidation behaviour of FeAl intermetallics: effects of reactive elements on cyclic oxidation properties  
C.-H. Xu and W. Gao
- 333 Optimisation of a multiphase intermetallic metal-metal composite material  
J. D. Robson, N. Duvauchelle, A. Lugan, J. Street, and H. K. D. H. Bhadeshia
- 338 Determination of initial interface debonding in tungsten fibre reinforced epoxy composite using photon emission and electric current fluctuation  
S. Kawazoe and Y. Kagawa
- 343 Synthesis of hydrophobic aerogels for transparent window insulation applications  
A. Venkateswara Rao, G. M. Pajonk, and D. Haranath
- 349 *Short communication* Influence of deformation temperature on matrix metal flow and whisker orientation in SiC<sub>w</sub>/6061 aluminium alloy composite during compressive deformation  
W.-L. Zhang, D.-Z. Wang, Z.-K. Yao, and M.-Y. Gu
- 355 *Overview* Residual stress  
Part 1 - Measurement techniques  
P. J. Withers and H. K. D. H. Bhadeshia
- 366 *Overview* Residual stress  
Part 2 - Nature and origins  
P. J. Withers and H. K. D. H. Bhadeshia
- 376 Modelling deformation hardening and steady state deformation of Al-Mg alloys  
K. Marthinsen and E. Nes
- 389 Theory of bubble growth in crystals and implications concerning nuclear fuel  
B. Burton
- 399 Theory of bubble growth in crystals under stress  
B. Burton
- 403 Modelling precipitation of niobium carbide in austenite: multicomponent diffusion, capillarity, and coarsening  
N. Fujita and H. K. D. H. Bhadeshia
- 409 Compressive behaviour capable of predicting hot tensile ductility behaviour in a 0.1%C-Mn steel  
J. D. Lee and W. J. Kim
- 415 Modelling of cold roll forming of steel strip  
Z.-W. Han, L.-Q. Ren, C. Liu, and W.-P. Lu
- 419 Residual stresses on flat specimens of different kinds of grey and nodular irons after laser surface remelting  
J. Grum and R. Šturm
- 425 Influence of microstructure and of chromium content on the oxidation behaviour of spin cast high speed steels  
A. Molinari, G. Straffelini, A. Thomasi, A. Biggi, and G. Corbo
- 431 Effect of strain rate and test temperature on flow behaviour and microstructural evolution in AA 8090 Al-Li alloy  
W. Fan, B. P. Kashyap, and M. C. Chaturvedi

- 439 Effect of layered microstructure and its evolution on superplastic behaviour of AA 8090 Al-Li alloy  
W. Fan, B. P. Kashyap, and M. C. Chaturvedi
- 446 Effect of microstructure on fatigue behaviour of cast Al-7Si-Mg alloy  
G. Atxaga, A. Pelayo, and A. M. Irisarri
- 451 Mechanism of bonding of Al-Pb alloy strip and hot dip aluminised steel sheet by hot rolling  
J. An, Y. B. Liu, and D. R. Sun
- 455 Influence of alloying elements on thermal conductivity and high temperature strength of copper based alloys  
K. T. Kim, W. J. Jung, and C. S. Choi
- 459 Ni<sub>3</sub>Al based composite interlayers for wide gap transient liquid phase bonding of NiAl-Hf single crystals to a nickel base superalloy  
W. F. Gale and X. Wen
- 465 Solidification and microstructure of ZA27/SiC<sub>p</sub> composite fabricated by mechanical-electromagnetic combination stirring process  
Z.-Q. Li, S.-Y. Zhang, and B.-Y. Wu
- 472 Wave propagation in fibre reinforced composite plate with circular hole under impact loading  
H. X. Liu, C. H. Zhang, and X. R. Zhou
- 481 Review of rejuvenation process for nickel base superalloys  
A. James
- 487 The  $\theta$  projection method applied to small strain creep of commercial aluminium alloy  
P. W. Evans and P. J. Scharring
- 494 Equilibrium pseudo-binary Al-Mg<sub>2</sub>-Si phase diagram  
J. Zhang, Z. Fan, Y. Q. Wang, and B. L. Zhou
- 497 Rate dependent deformation of carbon fibre reinforced Al-Li metal matrix composite  
W.-S. Lee and W.-C. Sue
- 505 Relation between hardness and tensile properties in various single structured steels  
M. Umemoto, Z. G. Liu, K. Tsuchiya, S. Sugimoto, and M. M. A. Bepari
- 512 Design of novel high strength bainitic steels: Part 1  
F. G. Caballero, H. K. D. H. Bhadeshia, K. J. A. Mawella, D. G. Jones, and P. Brown
- 517 Design of novel high strength bainitic steels: Part 2  
F. G. Caballero, H. K. D. H. Bhadeshia, K. J. A. Mawella, D. G. Jones, and P. Brown
- 523 Combined equilibrium and non-equilibrium segregation treatment of temper embrittlement in low alloy steels  
J.-H. Song, R. G. Faulkner, and P. E. J. Flewitt
- 529 Effect of strain rate on fracture toughness of mild steel  
M. Srinivas and K. V. Kamat
- 536 Model for static recrystallisation critical temperature in microalloyed steels  
S. F. Medina, A. Quispe, and M. Gomez
- 545 Identification of processing parameters for Fe-15Cr-2.2Mo-15Ni-0.3Ti austenitic stainless steel using processing maps  
P. V. Sivaprasad, S. L. Mannan, Y. V. R. K. Prasad, and R. C. Chaturvedi
- 551 Study of steam turbine blade degradation  
Part 1 - Degradation of mechanical properties of blade during service  
X. H. Yang and W. Z. Dui
- 556 Study of steam turbine blade degradation  
Part 2 - Damage mechanical model of blade materials during long term service  
X. H. Yang and W. Z. Dui
- 559 Microstructure and tensile properties of modified 9Cr-1Mo steel (grade 91)  
K. S. Chandravathi, K. Laha, K. Bhanu Sankara Rao, and S. L. Mannan
- 566 Effect of hot working variables on microstructure and brittle to ductile transition in Ti-46.5Al-3Nb-2Cr-0.2W gamma titanium aluminide  
V. M. Imaev, R. M. Imaev, A. V. Kuznetsov, O. N. Senkov, and F. H. Froes
- 573 Effects of boron, carbon and silicon additions on microstructure and properties of a Ti-1.5Mo based beta titanium alloy  
L.-H. Chen, P. A. Blenkinsop, and I. P. Jones
- 581 Development of oxidation resistant coatings for titanium alloys  
I. Gurrappa and A. K. Gogia
- 588 Wear resistance of austenite-TiC-graphite microstructures prepared by laser coating  
J.-D. Hu, J.-F. Luan, Q.-Z. Dong, Z.-F. Zhou, and S. Tosto
- 593 Aluminium foaming using a CO<sub>2</sub> laser  
Y. P. Kathuria
- 597 Interfacial microstructure and mechanical behaviour in laser clad TiC<sub>p</sub>/Ni alloy coatings  
X. L. Wu and Y. S. Hong
- 601 Modification of residual stress by post-weld vibration  
A. S. M. Y. Munsif, A. J. Waddell, and C. A. Walker
- 606 Preparation and characterisation of lanthanum doped BaTiO<sub>3</sub> nanosize polycrystals by sol-gel processing  
J.-B. Liu, W.-C. Li, Z.-M. Wang, and C.-P. Zheng
- 615 Literature review Grain boundary engineering and the role of the interfacial plane  
P. Davies and V. Randle
- 627 Review of creep behaviour of AZ91 magnesium alloy produced by different technologies  
S. Spigarelli, M. Regev, E. Evangelista, and A. Rosen
- 639 Microstructure and tensile properties of squeeze cast Al-Zn-Mg-Cu alloy  
H. R. Hashemi, H. Ashoori, and P. Davami

- 645 Evaluation of properties and microstructure of non-heat treatable Al-Mg-Li-C-O alloys with variable Li concentration  
W. J. Vine, P. D. Pitcher, and A. D. Tarrant
- 651 Influence of heat treatment and cutting speed on chip segmentation of age hardenable aluminium alloy  
C. Muller and R. Blümke
- 655 Calculations of electrical resistivity for Al-Cu and Al-Mg-Si alloys  
P. Olafsson and R. Sandström
- 663 Atomic simulation of amorphisation and crystallisation of  $\text{Al}_{50}\text{Ni}_{50}$  during rapid solidification  
L. Wang, X.-F. Bian, and J.-X. Zhang
- 668 Grain structure of laser remelted 7075 aluminium alloy in presence of  $\text{Al}_2\text{O}_3$  particles  
K. Zhang and G. N. Chen
- 671 Mechanical and chemical properties of  $\text{Ni}_3\text{Si}$  and  $\text{Ni}_3(\text{Si,Ti})$  alloys multiphased by chromium addition  
T. Takasugi, H. Kawai, and Y. Kaneno
- 681 Fatigue behaviour of Zn-Al casting alloys  
T. Savaskan, M. Aydın, and H. A. Odabaşioğlu
- 686 Modelling of isothermal formation of pearlite and subsequent re-austenitisation in eutectoid steel during continuous heating  
F. G. Caballero, C. Capdevila, and C. Garcia de Andrés
- 693 Heterogeneous deformation and recrystallisation of iron base oxide dispersion strengthened PM2000 alloy  
C. Capdevila, Y. L. Chen, N. C. K. Lassen, A. R. Jones, and H. K. D. B. Bhadeshia
- 700 Effect of grain size and carbide thickness on impact transition temperature of low carbon structural steels  
M. S. Bingley
- 715 Geometry dependent ductile to brittle transition of 10CrMoNbV ferritic-martensitic steel Manet II in terms of critical crack sizes  
M. Lambrigger
- 721 Model for cooling and phase transformation behaviour of transformation induced plasticity steel on runout table in hot strip mill  
H. N. Han and S.-H. Park
- 727 Oxidation behaviour of three-dimensional woven C/SiC composites  
X. Yin, L. Cheng, L. Zhang, Y. Xu, and X. Luan
- 731 Effect of niobium on electrical properties of  $\text{Sr}_{0.8}\text{Bi}_{0.2}(\text{Ta}_{1-x}\text{Nb}_x)_2\text{O}_{9+x}$  thin films processed by sol-gel method  
S.-J. Park, J.-H. Lee, and G.-E. Jang
- 736 Evolution and analysis of  $\gamma'$  rafting during creep of single crystal nickel base superalloy  
S. G. Tian, C. R. Chen, J. H. Zhang, H. C. Yang, X. Wu, Y. B. Xu, and Z. Q. Hu
- 749 Review Materials aspects for copper interconnection technology for semiconductor applications  
S. P. Murarka

## FEMS lectures

- 759 Monitoring elastic strain and damage by neutron and synchrotron X-ray beams  
P. J. Withers
- 766 Impact of electronic structure calculations on study of diffusion in metals  
F. Willaime
- 772 The fascination of grain boundary grooves  
E. Rabkin and L. Klinger
- 777 Material damage evaluation and residual life assessment of primary power plant components using specimens of non-standard dimensions  
E. Lucon
- 786 Stochastic modelling of dendritic grain structures  
Ch.-A. Gandin
- 
- 790 High temperature, high strain forging behaviour of binary Al-Li alloy  
S. S. Menon and H. J. Rack
- 795 Assessment and modelling of isothermal forging of intermetallic compounds  
Part 4 - NiAl  
J. C. F. Millett, J. W. Brooks, and I. P. Jones
- 802 New Al-Li-Mg-C dispersion strengthened alloy  
Part 1 - Composition and process development  
W. J. Vine, P. D. Pitcher, and A. D. Tarrant
- 807 New Al-Li-Mg-C dispersion strengthened alloy  
Part 2 - Optimisation of material for forging applications  
P. D. Pitcher, R. S. Bushby, W. J. Vine, A. F. Smith, and A. D. Tarrant
- 815 Effect of high energy ball milling on solid state reactions in Al-25 at.-%Ni powders  
D. Y. Ying and D. L. Zhang
- 823 Processing, microstructure, and properties of Mg-SiC composites synthesised using fluxless casting process  
S. C. V. Lim, M. Gupta, and L. Lu
- 833 Interfacial reactions in  $\text{K}_2\text{Ti}_6\text{O}_{13\text{W}}/\text{Al}_2\text{O}_3/\text{Al}$  composite  
D. Y. Ding and J. N. Wang
- 837 Processing of immiscible metallic alloys by rheomixing process  
Z. Fan, S. Ji, and J. Zhang
- 843 Effect of boron on hot ductility of low carbon low alloyed steel  
H.-W. Luo, P. Zhao, Y. Zhang, and Z.-J. Dang

- 847 Influence of sulphur and vanadium additions on toughness of bainitic steels  
N. Tsunekage, K. Kobayashi, and H. Tsubakino
- 856 Instrumentation and simulation of industrial steel wire rod cooling line  
H. F. Labib, Y. M. Youssef, R. J. Dashwood, and P. D. Lee
- 864 Effect of friction on deformation during rolling as revealed by embedded pin technique  
S. Das, E. J. Palmiere, and I. C. Howard
- 874 Multipass rolling of aluminium alloys: finite element simulations and microstructural evolution  
M. S. Mirza, C. M. Sellars, K. Karhausen, and P. Evans
- 880 Study of hot corrosion of alloy 800 using linear polarisation resistance and weight loss measurement  
C. Cuervas-Arteaga, J. Porcayo-Calderon, G. Izquierdo, A. Martinez-Villafañe, and J. G. Gonzalez-Rodriguez
- 891 *Materials perspective* Biomedical materials for new millennium: perspective on the future  
J. R. Jones and L. L. Hench
- 901 Effect of treatment variables on size-refinement by phosphide inoculants of primary silicon in hypercutectic Al-Si alloys  
W. J. Kyffin, W. M. Rainforth, and H. Jones
- 906 Effect of bonding variables on bonding mechanisms in press bonding superplastic 8090 aluminium alloy  
H. Wu and S. Lee
- 912 Thermal mismatch stress in SiC whisker reinforced aluminium composite: new measurement method by X-ray diffraction  
W. D. Fei, Q. Y. Liu, N. G. Liang, and C. K. Yao
- 917 Refinement of  $\text{Fe}_3\text{Al}_{13}$  in Al-Fe alloys by plasma remelting process  
X. F. Bian, X. M. Pan, C. Zhao, and S. J. Yuan
- 921 Fabrication of 6061 aluminium alloy/ $\text{Al}_{18}\text{B}_4\text{O}_{33(\text{m})}$  composite by using sol-gel alumina binder  
D. Y. Ding and J. N. Wang
- 926 Microstructure and properties of  $\text{SiC}_n$ /6061 aluminium alloy composites after compression at temperatures around solidus of matrix  
G. S. Wang, J. Zhang, L. Geng, D. Z. Wang, and C. K. Yao
- 933 Effects of atmospheric conditions on mechanical mixed layer formation and wear behaviour in A356-15 vol.% $\text{SiC}_p$  composite  
R. A. Saravan, S. B. Kang, and J. M. Lee
- 938 Effect of thermal treatments on microstructure and impact toughness of die cast Mg-Al-Mn alloys  
M. Vedani and C. Mapelli
- 945 Corrosion resistance of Ti-6246 for high power aeroengine compressor disks and blades  
M. Evans and A. R. Ward
- 954 Pretreatment process of SiC particles and fabrication technology of SiC particulate reinforced Zn-Al alloy matrix composite  
Z.-Q. Li, B.-Y. Wu, and S.-Y. Zhang
- 961 Thermal stability of electrodeposited nanocrystalline nickel and iron-nickel alloys  
M. Thuvander, M. Abraham, A. Cerezo, and G. D. W. Smith
- 971 High temperature deformation of aluminium bronze  
L. Blaz and A. Nowotnik
- 976 Sliding behaviour of a nanophased AISI M2 obtained by mechanomaking and hot isostatic pressing  
L. Ceschini, V. Porcarelli, and P. Matteazzi
- 983 Models for transformation plasticity in loaded steels subjected to bainitic and martensitic transformation  
C. C. Liu, K. F. Yao, X. J. Xu, and Z. Liu
- 989 Effect of welding parameters on diffusion bonding of type 304 stainless steel-copper bimetal  
O. Yilmaz
- 995 Axisymmetric compression test and the hot working alloys  
R. W. Evans and P. J. Scharning
- 1005 Origin of hard and soft zone formation during cladding of austenitic/duplex stainless steel on plain carbon steel  
R. Rajeev, I. Samajdar, R. Raman, C. S. Harendranath, and G. B. Kale
- 1012 New technology for fabrication of C/SiC composites reinforced by continuous carbon tows  
P. Xiao, Y. Xu, L. Zhang, L. Cheng, and Z. Chen
- 1018 *Short communication* Extrusion upsetting multiple processing in sandglass die  
W. Lu, Y. Wang, Z. H. Feng, and J. T. Hai
- 1021 *Short communication* Replacement of conventionally complex processing for low alloy steel 20Cr2Ni4A by rare earth carburizing at lower temperature  
M. F. Yan, C. H. Cai, and Z. R. Liu
- 1025 *Short communication* Novel  $\text{Fe}_{70}\text{Zr}_{10}\text{Ni}_6\text{Al}_4\text{Si}_6\text{B}_4$  thick metallic glass coating produced by laser cladding  
X. L. Wu and Y. S. Hong
- 1033 *Overview* Test methods for measuring tensile strength and ductility of electroplated and electroless copper deposits  
K. G. Keong and W. Sha
- 1039 Synthesis of boron nitride from ferroboron  
Part 1 - Nitriding  
T. Warner, C. Liu, and D. J. Fray
- 1045 Synthesis of boron nitride from ferroboron  
Part 2 - Leaching  
C. Liu and D. J. Fray
- 1050 Microstructure in titanium carbonitride cermets  
N. Liu, Q. M. Zeng, and X. M. Huang
- 1055 Effect of strain path on recrystallisation kinetics during hot rolling of Al-Mn  
M. P. Black, R. L. Higginson, and C. M. Sellars

- 1061 Mechanism of high temperature oxidation of laser surface engineered TiC/Al 'composite' coating on 6061 aluminium alloy  
L. R. Katipelli and N. B. Dahotre
- 1069 Relationship between tensile strength and preparation conditions for nickel foam  
P. S. Liu, K. M. Liang, S. W. Tu, S. R. Gu, Q. Yu, T. F. Li, and C. Fu
- 1073 Tensile and compression performance of superelastic NiTi tubing  
D. J. Siddons and J. R. Moon
- 1079 Thermomechanical fatigue behaviour of nickel base superalloy IN738LC  
Part 1 – Comparison of two unified constitutive models for description of mechanical behaviour  
E. Fleury and J. S. Ha
- 1087 Thermomechanical fatigue behaviour of nickel base superalloy IN738LC  
Part 2 – Lifetime prediction  
E. Fleury and J. S. Ha
- 1093 Estimation of air gap and heat transfer coefficient at different faces of Al and Al-Si castings solidifying in permanent mould  
M. A. Taha, N. A. El-Mahallawy, M. T. El-Mestekawi, and A. A. Hassan
- 1102 Structural stability and non-catalytic nucleation inhibition effect of Si-Zr-B mould coating on undercooled superalloy melt  
F. Liu, X. F. Guo, and G. C. Yang
- 1107 Fatigue behaviour of duplex metal coated SiC fibre reinforced Ti-15-3 matrix composites  
S. Guo and Y. Kagawa
- 1114 Kinetics and dilatometric behaviour of non-isothermal ferrite-austenite transformation  
F. G. Caballero, C. Capdevila, and C. García de Andrés
- 1119 Ultrahigh strength hot rolled microalloyed steels: microstructural aspects of development  
R. D. K. Misra, G. C. Weatherly, J. E. Hartmann, and A. J. Boucek
- 1130 Surface residual stresses and fatigue life of new ultrahigh strength microalloyed steel  
R. D. K. Misra and J. P. Anderson
- 1133 Modelling the hot plane strain compression test  
Part 1 – Effect of specimen geometry, strain rate, and friction on deformation  
M. S. Mirza and C. M. Sellars
- 1142 Modelling the hot plane strain compression test  
Part 2 – Effect of friction and specimen geometry on spread  
M. S. Mirza and C. M. Sellars
- 1149 Fractal theory study on morphological dependence of viscosity of semisolid slurries  
R. S. Qin and Z. Fan
- 1153 Asymmetric behaviour of fibrous metal matrix composites  
M. M. Aghdam, D. J. Smith, and M. J. Pavier
- 1158 Diffusion bonding of titanium alloy to stainless steel wire mesh  
P. He, J. H. Zhang, and X. Q. Li
- 1163 Effect of mixed mode I/III loading on plastic zone in Armco Iron  
S. V. Kamat and M. Srinivas
- 1166 Growth and characterisation of ferroelectric potassium lithium niobate crystals  
Y.-B. Wan, J.-H. Chu, T.-Y. Yu, B.-K. Yu, and S.-K. Pan
- 1169 *Short communication* Texture and microstructure in very fine grain Al-Al<sub>3</sub>Ti alloys obtained by extrusion of mechanically alloyed powders  
S. Lenhard, K. Helming, C. P. Chang, F. Wagner, and T. Grosdidier
- 1175 *Literature review* Cleanliness, castability, and surface quality of formable sheet steels  
L. D. Way
- 1191 Precipitation and deformation behaviour of cast alloy 718 during creep and thermal exposure  
C.-Y. Jo, D.-W. Joo, and I.-B. Kim
- 1197 Morphology and microstructure of Al<sub>2</sub>/SiC<sub>p</sub> composite powder prepared using a stone mill  
S. S. Cho, D. J. Zin, S. H. Eom, and Y. H. Cho
- 1205 Mathematical model of influence of rapid induction heating on nucleation and growth of precipitates  
S. H. Ravazi, Sh. Mirdamadi, H. Arabi, and J. Szpunar
- 1211 Characterisation of aluminium alloys after HNO<sub>3</sub>/HF-NaOH-HNO<sub>3</sub>/HF pretreatment  
K. J. H. Nelson, A. E. Hughes, R. J. Taylor, B. R. W. Hinton, L. Wilson, and M. Henderson
- 1222 Hot deformation mechanisms in metastable beta titanium alloy Ti-10V-2Fe-3Al  
V. V. Balasubrahmanyam and Y. V. R. K. Prasad
- 1229 Bainitic transformation kinetics and stress assisted transformation  
C. C. Liu, D.-Y. Ju, K. F. Yao, Z. Liu, and X. J. Xu
- 1238 Nuclei for heterogeneous formation of graphite spheroids in ductile cast iron  
J. K. Solberg and M. I. Onsoien
- 1243 Microstructure of electromagnetic stir cast grain refined iron base alloy  
X. F. Pan, H. F. Zhang, A. M. Wang, K. Q. Qiu, B. Z. Ding, and Z. Q. Hu
- 1249 Diffusion annealing and laser surface alloying with aluminium to enhance oxidation resistance of carbon steels  
S. Rajendran Pillai, P. Shankar, R. V. Subba Rao, N. Sivai Barasi, and S. Kumaravel
- 1253 Mechanistic model for grain size and temperature dependence of flow stress in 316L austenitic stainless steel  
K. K. Singh and S. Sangal
- 1259 Stages of fatigue fracture in nickel alloyed powder metallurgy steel  
H. Drar
- 1265 Comparison of creep behaviour of 225Cr-1Mo/9Cr-1Mo dissimilar weld joint with its base and weld metals  
K. Laha, S. Latha, K. Bhanu Sankara Rao, S. L. Mannan, and D. H. Sastry

- 1273 Effect of tempering on nitrided and deformed austenitic stainless steel  
M. Eskafi and A. Hendry
- 1280 Welding of austenitic stainless steel using double sided arc welding process  
Y. M. Zhang, C. Pan, and A. T. Male
- 1285 Abrasive wear of FeCr ( $M_{7C_3}$ - $M_{23}C_6$ ) reinforced iron based metal matrix composites  
O. Yilmaz
- 1293 Wettability of preoxidised TiAl substrates by liquid aluminium, copper, and silver  
Y. Shen, W. F. Gale, J. W. Fergus, and X. Wen
- 1299 Concise formula for tensile strength of knitted fabric reinforced composite  
Z. M. Huang
- 1306 Influence of thermal cycling on fatigue strength of Cu/Sn/Cu solder joints  
H. Kato, T. Masaki, and K. Kageyama
- 1314 Note on 'Theory for growth of spherical precipitates with capillarity effects'
- 1317 Review Grain boundary structure, chemistry, and failure  
C. L. Bryant
- 1324 Effect of compositional variations on characteristics of coarse intermetallic particles in overaged 7000 aluminium alloys  
X.-M. Li and M. J. Starink
- 1329 Formation of uniformly fine grained ferrite structure through multidirectional deformation  
T. Inoue, S. Torizuka, and K. Nagai
- 1339 Finite element analysis of reinforcement particle coalescence in Al/SiC<sub>p</sub> composites  
P. Scarber, Jr and G. M. Janowski
- 1347 Deformation and dissolution of spheroidal cementite in eutectoid steel by heavy cold rolling  
X. J. Hao, Z. G. Liu, K. Masuyama, T. Rikimaru, M. Umemoto, K. Tsuchiya, and S. M. Hao
- 1353 Texture development in cold rolled and annealed C-Mn-Si and C-Mn-Al-Si TRIP steels  
M. De Meyer, L. Kestens, and B. C. De Cooman
- 1360 Effect of process variables on the formation of dynamic strain induced ultrafine ferrite during hot torsion testing  
P. J. Hurley and P. D. Hodgson
- 1369 Microstructural control by secondary processing of strip cast low carbon steel  
M. Ferry and C. Page
- 1377 Grain boundary segregation of phosphorous, manganese, and carbon in boiler shell weld material  
P. Maier, R. G. Faulkner, P. Spellward, and J. R. Cowan
- 1385 Evaluation of effect of chromium on wear performance of high manganese steel  
I. El-Mahallawi, R. Abdel-karim, and A. Naguib
- 1391 Effects of aging on impact behaviour of different stainless steel weldments  
G. Straffelini, A. Molinari, F. Bonollo, and A. Tiziani
- 1398 *In situ* transmission electron microscopy investigation of crack propagation in single crystal Ni<sub>3</sub>Al  
Z. W. Shan, X. Wu, L. Liu, J. H. Yang, and Y. B. Xu
- 1403 High temperature fatigue of a polycrystalline nickel base superalloy  
D. M. Knowles and D. K. Skelton
- 1413 Rapid forming of superplastic aluminium alloy 5083  
S. Lee, Y.-H. Yu, H.-Y. Wu, J.-Y. Wang, and C.-P. Chang
- 1417 Evaporation of Al and microstructure variation in TiAl alloy during heat treatment  
Q.-F. Xia, J. N. Wang, J. Yang, and Y. Wang
- 1423 Microstructural development and mechanical properties of wide gap and conventional transient liquid phase bonds between Ti-48Al-2Cr-2Nb substrates  
W. F. Gale, X. Wen, T. Zhou, and Y. Shen
- 1434 Temperature control of TiAl melt during induction skull melting  
Y.-Q. Su, J.-J. Guo, G.-Z. Liu, J. Jia, and H.-S. Ding
- 1441 Effect of reaction layer thickness on strength of Al<sub>2</sub>O<sub>3</sub>/AgCuTi/Ti-6Al-4V brazed joints  
Z.-S. Yu, M.-F. Wu, and F.-J. Wang
- 1444 Erosion-corrosion-abrasion characteristics in slurry of a zinc based alloy and its composite containing alumina particle dispersoid  
B. K. Prasad, O. P. Modi, A. K. Jha, R. Dasgupta, S. Das, D. P. Mondal, and A. H. Yegneswaran
- 1451 Role of beam interaction time in laser cladding process  
Y. P. Kathuria
- 1455 New method for preparing composite containing nanometre diamond particles  
Y.-W. Xiang, J.-Y. Zhang, C.-H. Jin, and J.-F. Fang
- 1459 Effects of anodic oxidation treatment for three-dimensional carbon fibre braided fabric on properties of its composite  
Y. D. Huang, H. L. Cao, and Z. Q. Zhang
- 1465 Exceeding average rule of mixtures stiffness in composite materials with interconnected fibres as reinforcement  
V. V. Ganesh and M. Gupta
- 1472 Characterisation of stearate/stearic acid coated fillers  
M. Gilbert, P. Petiraksakul, and I. Mathieson
- 1479 Chemical imaging of iron oxides and oxyhydroxides using near infrared Raman imaging microscopy  
K. N. Jallad and D. Ben-Amotz
- 1487 Effects of coating treatment on mechanical properties of carbon fibres and reinforced silicon carbide composites  
C.-J. Li and L.-S. Yan
- 1491 Overview New thin film permanent magnets  
J. S. Jiang and S. D. Bader

- 1500 Galvanising and galvannealing behaviour of B added TiNb IF high strength steel  
I. Hertveldt, S. Claessens, and B. C. De Cooman
- 1508 Hot dip galvanising and galvannealing of P and Mn strengthened TiNb IF steels  
I. Hertveldt, S. Claessens, and B. C. De Cooman
- 1516 Microstructural evolution during fabrication of ultrafine grained ( $\alpha + \beta$ ) titanium alloy  
J. L. Gu, X. J. Sun, B. Z. Bai, and N. P. Chen
- 1525 Relationship among dynamic magnetoelasticity, soft magnetic properties, and amorphous structure homogeneity in new alloy  $\text{Fe}_{62.5}\text{Co}_6\text{Ni}_{7.5}\text{Zr}_6\text{Cu}_1\text{Nb}_2\text{B}_{15}$   
G. Ausanio, V. Iannotti, C. Luponio, and L. Lanotte
- 1531 Effects of dendritic arm coarsening on macroscopic modelling of solidification of binary alloys  
S. Chakraborty and P. Dutta
- 1539 Fatigue crack growth behaviour in aluminium alloy 7475 under different aging conditions  
R. Gurbuz and F. Sarioglu
- 1544 Phase transformation behaviours and shape memory characteristics of  $\text{Ti}-(45-x)\text{Ni}-5\text{Cu}-x\text{Mo}$  ( $x = 0.3-1.0$ ) alloys  
J.-P. Noh, D.-W. Chung, H.-W. Lee, and T.-H. Nam
- 1551 Mechanism of dislocation shearing of  $\gamma'$  in fine precipitate strengthened superalloy  
Y. H. Zhang, Q. Z. Chen, and D. M. Knowles
- 1556 Digital photocalorimetric measurements of cooling rates in chill block melt spinning of  $\text{Mm}(\text{NiCoMnAl})_5$  hydride forming alloy  
S. Gulbrandsen-Dahl, J. K. Solberg, and Ø. Grong
- 1563 Application of bainite transformation model to estimation of processing window boundaries for Mn-Mo-Cu austempered ductile iron  
S. H. Zehiri, E. V. Pereloma, and C. H. J. Davies
- 1569 Anisotropic dilation behaviour during transformation of hot rolled steels showing a banded structure  
T. A. Kop, J. Sietsma, and S. van der Zwaag
- 1575 Influence of deformation processing on tensile response of dispersion strengthened copper  
T. S. Srivatsan, M. Al-Hajri, A. Melendez, C. F. Whittel, and J. D. Troxell
- 1580 Effect of plastic strain on grain size of ferrite transformed from deformed austenite in Si-Mn steel  
T. Inoue, S. Torizuka, K. Nagai, K. Tsuzaki, and T. Ohashi
- 1589 Influence of excess titanium on hot ductility of C-Mn-Cr-Al steel  
H. Luo and P. Zhao
- 1596 Precipitation and hot ductility of low C-V and low C-V-Nb microalloyed steels during thin slab casting  
K. Banks, A. Koursaris, F. Verdoorn, and A. Tuling
- 1605 Characterisation of microstructure and texture in friction stir welded joints of 5754 and 5182 aluminium alloy sheets  
H. Jin, S. Saimoto, M. Ball, and P. L. Threadgill
- 1615 Behaviour of surface oxide scale before roll bite in hot rolling of steel  
Y. H. Li and C. M. Sellars
- 1624 Reactive sintering of stainless steel  
C. C. Degnan, P. Jackson, D. P. Weston, and J. V. Wood
- 1635 Unlubricated sliding of a titanium aluminide alloy against M2 tool steel  
S. Gialanella and G. Straffolini
- 1642 Study of deoxidation of 2024-T3 with various acids  
A. E. Hughes, G. Theodossiou, S. Elliott, T. G. Harvey, P. R. Miller, J. D. Gorman, and P. J. K. Paterson
- 1653 Technique for producing crack arrest by electromagnetic heating  
Y.-M. Fu, X.-Z. Bai, G.-Y. Qiao, Y.-D. Hu, and J.-Y. Luan
- 1657 Fatigue behaviour of PMMA/silica acrylic casting dispersions  
J. D. Costa, J. M. Ferreira, and C. Capela
